

COMPANY PROFILE

JETICH PROJECT LIMITED.

Where Quality Meets Durability.

Construction · Civil Engineering · Project Delivery — Abuja, Nigeria
RC 8073296 (CAC) · COREN Affiliation EF.1747 · www.jetichproject.com

BRIDGING THE ENGINEERING GAP.

Jetich Project Limited is a fast-growing, multi-disciplinary Engineering Consultancy and Project Management firm known for delivering innovative and sustainable infrastructure solutions. With a reputation built on excellence, we serve governments, developers and organizations seeking precision and reliability in construction.

Headquartered in Abuja, Nigeria, we operate across diverse sectors including transportation, housing, energy and commercial real estate. We are COREN-registered, and we exist to close the gap between “work done” and “work done right” — acting not as another contractor, but as your **Project Delivery Partner**.

OUR VISION

“To be one of the global leaders in sustainable construction, recognized for excellence in innovation, execution, quality, durability, and client satisfaction.”

01

Unified Engineering Front

Design, supervision and construction speak with one voice — one accountable partner from inception to handover.

02

Trained On-Site Supervision

Quality is enforced where the work happens. Our engineers verify that what is built matches what was designed.

03

Cost Efficiency through Precision

Precise engineering and disciplined procurement eliminate rework and waste — the silent killers of budgets.

WHAT WE DO

OUR SERVICES

Five disciplines, one accountable engineering front — from the first drawing to final handover.

01

Civil & Structural Engineering

Structural design, detailing and on-site verification engineered for Nigerian conditions and international codes.

02

Building Construction

Complete builds — setting out, substructure, superstructure and finishes — with trained supervision at every stage.

03

Project Management

Consultants, contractors and suppliers coordinated under a single front — protecting programme, budget and standard.

04

Renovation & Remodeling

Upgrades and conversions executed with the same rigour as new builds — strengthening what is sound, replacing what is not.

05

Procurement & Logistics

Certified materials and managed site logistics so programmes are never held hostage by supply.

WHY CHOOSE JETICH

BUILT ON PRECISION, DELIVERED WITH ACCOUNTABILITY.

Experienced Team

Seasoned experts with proven track records across transportation, housing, energy and commercial real estate.

Client-Focused

We build to reflect your goals and vision — not our convenience.

Eco-Conscious

Green building methods that protect our planet, for developments built to last.

Global Standards

Adherence to ISO and international best practices on every engagement.

Innovative Technology

BIM, drones and smart construction tools applied where they genuinely improve outcomes.

Project Delivery Partner

A single accountable front from design through commissioning — the Jetich difference.
